

## English Bootcamp Presentation

Our English Bootcamp, which was in January 2022, lasted 2 weeks.

It was divided in two different projects, one by week. On the following parts I will present you briefly each one of them.

About the first week, we were divided in groups of five or six people with all classes ( Web Developers, Web Designs and Web Markets). Our team had to imagine a Web Design company as a new one or an existing one and talk about the services we were delivering. We played a lot of games with other groups to earn money and the team which had the most money at the end of the week was declared winner.

We had to do a report as a company and explain clearly our services, our experiments and our partners.

Also, we had to prepare a few questions for our partners with our teachers during an interview time.

Here is the flyer we did and put in our report :

About the second week, as we did it during the first week, we were divided in groups of five or six people and with the three different classes.

Our mission was to imagine us opening our restaurant and we had to make menus with ingredients already given.

So we had to be imaginative and logic with our choices. We made also a advertisement and the storefront of our restaurant.

Here is storefront :

And our menu :
